

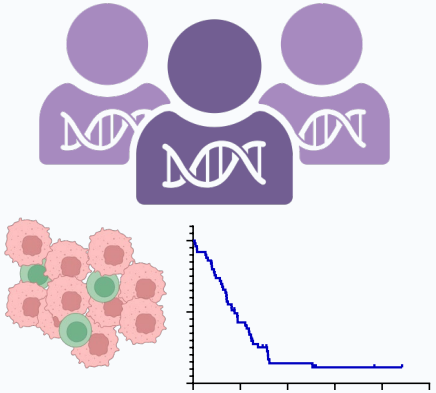
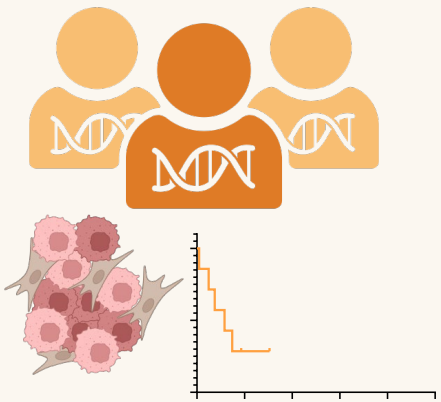
Group 1: Immune-enriched NE

- Better Survival
- *ASCL1*
- High NE genes
- High CD8 T cells
- High AMP signature
- High *DLL3*
- High *SEZ6*



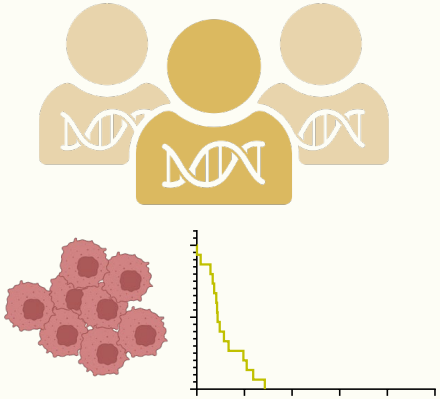
Group 2: SCLC-A

- Survival not associated with CD8 T cells
- *ASCL1*
- High NE genes
- High *DLL3*
- High *SLFN11*
- High *SEZ6*



Group 3: SCLC-N

- Poor survival
- *NEUROD1*
- High fibroblasts
- NE and non-NE genes
- High EMT
- High extracellular matrix
- High *SEZ6*



Group 4: Non-NE

- Worse survival
- *POU2F3/ YAP1*
- High Non-NE genes
- High *MYC* and *REST*
- High *PLCG2*
- High *TACSTD2*

CD8 T cells

NE – neuroendocrine cells

Fibroblast

Non-NE – non-neuroendocrine cells
